Exclusive Laminate – Classic Laminate

All the benefits at a glance

Give your ideas space by making your own personal flooring choice from the wide range of modern, authentic decors on offer from us. Our moderna laminate flooring is distinguished by its contemporary, authentic designs, accompanied by all the advantages of high-quality hard flooring. It is designed to be outstandingly robust and hard-wearing and to easily withstand all the stresses of everyday use. Thanks to our patented click system, you can lay your chosen moderna flooring quickly and easily. Moreover, our natural laminates bear the environmental “Blauer Engel” (Blue Angel) mark, showing them to be low-emission products that protect both the environment and your health.

Exclusive Laminate

Exclusive Laminate

A pure feeling for life in a special format – space for new ideas

This extra-long plank format lends more space to your ideas – in the truest sense of the word. With its miraculous visual effect, moderna canyon XL magically transforms a small room into a large one. And spacious rooms become even more expansive. A new dimension of perception. Serene wood finishes with a timeless oak look bring beauty and balance to your home. And at the same time satisfy the most stringent demands in terms of quality: Durable, fresh and individual, this laminate shows its extraordinary character every day from another side. Your inspiration in a special format: long, longer, moderna canyon XL.

Excusive Laminate
Very elegant, very solid – simply something special

Living in a stylish ambience – every interior lover’s dream. Time to wake up! moderna skyline turns dreams into an effortless reality. The classically cut extra-length panels are elegant and stylish in appearance – not least thanks to the special look of the all-round V-joint. When it comes to authenticity, the striking wooden finishes of moderna skyline are hard to beat. Planks 12mm thick give the impression of a solid and sophisticated wooden floor. moderna skyline will not only redefine your rooms, it will also bring with it a special charm and an atmosphere of well-being - finally turning your house into a home.

Exclusive Laminate
Endlessly long, extra-wide – and
genuinely impressive

Make your floor a feature and let it catch the eye! Because it's in a great place to do that.
moderna horizon gives living areas what they need: that certain extra something in terms of individuality and style. Invisible transitions from plank to plank create an impressive and endless character. Sophisticated and convincing. The beautiful, natural-looking oak decors make it difficult even for experts to tell moderna horizon from a real wooden floor.
And because we put extra thought into our laminates, selected decors from the collection are also available as staircase renovation systems: moderna scala. The perfect seamless continuation of your moderna horizon floor. More harmony, more expression. More than just a floor covering for your home.

Mix and match with a vintage look – unmistakably you

Your home tells your story: Your favourite furniture, special heirlooms, souvenirs from your last holiday – these things fill your home with life. Transform your floor into another part of this very personal story! **moderna variation** is as versatile and as rich in variety as you. Two different plank widths of 328 and 190 mm give you endless possibilities for creating a completely individual laying pattern. Splits and knotholes accentuate the deep wood texture. The result is a unique and unmistakable vintage look. Add even more character to your home: Make it a reflection of your life story! With all your desires, memories and experiences. With everything that defines you.

Exclusive Laminate
A timeless classic – always in style,
and universal

Every design starts with a vision – including the one for your living space. Bring your ideas to life! And keep them alive. Because a timeless plank format will never go out of fashion. moderna vision gives your rooms elegance – no matter what your style preferences are.

The effect of warm, natural wood tones is one of calm and balance. Light woods in pale grey tones bring that desirable Scandinavian look into a home. Such a classic floor design gives you all the possibilities for reinventing your living space time and again. For example combined with exciting colours and accessories to create dynamism. A special impression for a clear expression. Take the plunge and create your own basis for a beautiful interplay of contrasts! Your style is everlasting.

Warm and cosy: the tiles with a difference

Anyone with a taste for the unusual will love moderna vario! That's because its typical tile look makes more of your interior. Lend it an even more stylish appearance with the clarity of a modern tile floor, and at the same time take advantage of the convenience and feel-good character of a high-quality click laminate!

Buy it today, lay it tomorrow, it's pleasantly warm against your feet and extremely hard-wearing – moderna vario will impress you time and time again. You can guarantee that a conventional tile covering can't match that. And there's more: The vario XL format gives you an extra-long tile style for your living spaces – in the elegant natural slate design. Classic, attractive, always matching.

Classic Laminate

Trendy doesn't have to be expensive – but it needs to be good

We love variety. You too? But at the same time, who wants to make compromises with quality and high-quality decors? You often have to do that with low-cost products. But not with moderna impression: This floor gives you a very good price/performance ratio – in top-class quality and with fabulous designs.

With it we combine individual decors with optimum functionality: the laminate is easy to lay and maintain, always looks good and is extremely durable. moderna impression goes with what defines you. Impressively flexible, impressively good.

Product advantages of laminate

Blue Angel

You can rest assured that in terms of sustainability, we spare no effort whatsoever. For this reason, all our laminate products bear the “Blauer Engel” (Blue Angel) mark, which was launched in 1987 and is one of the leading symbols on the market for outstandingly environmentally friendly products. Our products are therefore exceptionally low in harmful emissions.

Made in Germany

As a traditional German enterprise, engaged in production since 1971, we are committed to manufacturing high-quality, highly attractive products. With our interior design products and furniture ranges we are one of the world’s leading producers. So also for that reason, as a family-owned enterprise, we see ourselves as having a responsibility to produce with vision and always striving to improve the quality and appearance of our products. Many years of cooperation with our partners and customers in the interior design industry and the furniture industry have consistently helped us to reach high demands and have therefore always been of especial importance to us.

Healthy living environment

As a traditional German enterprise, it is our constant striving to produce flooring for you using natural materials that meet the specified standards. The focus is thereby not only on the visual aspects, but also the health of our customers. Our flooring products are especially suited for allergy sufferers. Moreover, through the special design of the surface finish, they offer no breeding ground for bacteria and microorganisms and are very easy to clean. Sustainability also plays a highly important role, and is supported through continuous technical progress in the field of production.

Sturdy HDF-core with increased moisture protection

Through the special processing of top-quality materials in our factory, we achieve exceptionally good moisture protection values that even exceed the applicable official standards. This enables us to guarantee the highest quality standard for all our laminate flooring products.

Attractive laminate decors

moderna – The name says it all. We therefore make it our business to develop attractive laminate decors that are driven by trends but are also timelessly beautiful and stylish. Design your interior in line with your own ideas by choosing from our extensive range of attractive contemporary styles. The decors tend to differ in their nature-orientated designs and surface finishes. It is only the combination of the decorative effect and the surface embossing that gives the flooring its absolutely genuine appearance. The feel, appearance and design of the products play the key role. The product range therefore reflects the many different combination possibilities and variations of the various components. This means complete design freedom for you. Whatever style or trend you prefer, there is bound to be something for you.

Hard-wearing

As far as its hard-wearing qualities are concerned, laminate is easily a match for other floor coverings, such as parquet or vinyl. Laminate belongs to the category of hard floor coverings, and in terms of robustness and wear resistance is virtually unexcelled. Even the plank thickness contributes to a high-quality product. Moderna offers the following thicknesses: 7, 8, 10 and 12mm.

Easy-care

Generally speaking, laminate is very easy to clean. It is sufficient and, depending on staining, wipe it with a slightly damp cloth.

Easy laying thanks to the patented click system

Thanks to our patented click systems, moderna floors can be fitted in very little time. Even when installed as a floating floor (i.e. not glued to the underfloor), you can be sure that the system will cope with all stresses. Our standard systems have been successfully established on the market for many years and have consistently proved themselves. Moderna laminate floors are distinguished between 2 different click-systems.

Produced under licence of UNILIN

UNICLIC-System
This click-system is the one most commonly used. BHK uses the UNICLIC-system because both technically and functionally, it is one of the very best. Through the high pre-tensioning, the individual sections can be very quickly interlocked with one another, and laying progresses easily and speedily. The additional possibility of horizontal joining also simplifies laying in inaccessible places (e.g. under radiators or door frames). UNICLIC is characterised by high dimensional accuracy, optimum height match and joint-free friction locking.

Produced under licence of UNILIN

DUROCLIC-System
A twist, a click, and thanks to DUROCLIC, the flooring is interlocked. This system allows the planks to be laid singly or in rows. DUROCLIC counts as one of the tried-and-tested click-systems, because it makes laying extremely easy but at the same time meets all the requirements for a strong connection.

Extra-long plank format

These moderna collections are distinguished from those customary on the market by the extra-long plank format. It gives your home a style all of its own.

Strong & stylish

This also applies to the thickness of the product. Absolutely top quality, in combination with a long plank format, is what makes the skyline collection so attractive.

Endlessly long and wide

Not just long planks are currently much in favour, extra-wide planks are, too. The decors appear more restful and give a room a charm of its own. Combined with a modern vintage style, the planks acquire a special appearance.

Antistatic

You know the feeling when you walk in a room, then touch something and get a slight electric shock. This is because you have become statically charged through the floor. While these shocks are not life-threatening, they are certainly unpleasant. With moderna flooring, this unpleasant side-effect has an end. The surface is specially treated so as not to become charged when people walk on it.

Mix & Match

As the name moderna variation implies, this involves the combination of different plank widths with variations in how the boards are laid. This collection involves two board widths, one of 190 mm and one of 328 mm. So you can give free rein to your own creativity and ideas. The outcome can be whatever style and appearance takes your fancy.

Classical plank format

The classical plank format is the one that currently enjoys greatest popularity. In the dimensions 190 x 1287 and 1380 mm, 1-strip, 2-strip, 3-strip and multi-strip decors come out at their best.

moderna decors

For all our floor coverings, the best thing you can always do is check them out for yourself. Take a close look and physically feel the decor structure of the various floor coverings. As individual and diverse are the wishes of our customers, so varied and wide-ranging are the decors we have on offer. Visit the specialist retailers to gain your own impression of how our materials look and feel, or take a sample with you and try it out at home. Pay attention to the key parameters such as the decorative appearance, the embossing and the surface finish, as they all help you in deciding which one to choose. Based on our many years of experience, we have created the moderna decors through innovative new developments, achieving an authentic look of real wood, and also in the field of natural stone or tile imitation looking remarkably like the original.

Embossed-in-registered surface

The three-dimensional haptic structure corresponds exactly to the grain of the printed decoration. Through the synchronous surface structure, the wood decor appears especially authentic. The Embossed-in-registered surface structure corresponds almost exactly to the natural appearance of the wood. This is also a sign of high-quality laminate. The depth of the embossing is also a measure of the quality.

Wood structure

The wood structure can be felt on the surface as embossing. However, the embossing does not precisely correspond to the decor image. However, this discrepancy is virtually imperceptible, both to the touch and to the eye. Compared to a smooth surface, the wood structure presents an authentic, high-quality appearance.

In-depth structure

The in-depth structure is a specially developed structure that has the intention of further emphasize the character of the decor design. The surface finish is rough, coarse and uneven. However, that is how it is meant to be. The interaction between the surface finish and the decor image gives the flooring a special matte flair and perfectly emphasize the modern vintage style of moderna variation.

Stone structure

Through the coarse, rough embossing, a stone structure is perfectly imitated. The floor covering looks like stone and also feels like stone. However, it is as warm as wood flooring. The stone structure of our laminates is indistinguishable from a normal stone tile surface.

Wood relief structure

The relief structure is one of the most common and popular surface finishes on the market. The decor image can have a wood look, and thanks to its straight-line character, the relief embossing takes care of a natural look.

Fine & matt wood pore structure

Through the fine-pore embossing, the surface acquires a matte, velvety feel. Hardly discernible, the pores are nevertheless soft and supple. This surface does not thrust itself into the foreground but leaves the decor image to do its work.
