## Exclusive laminate – classic laminate

### All benefits at a glance

Give your ideas space by making your own personal flooring choice from the wide range of modern, authentic decors on offer from us. Our moderna laminate flooring is distinguished by its contemporary, authentic designs, accompanied by all the advantages of high-quality hard flooring. It is designed to be outstandingly robust and hard-wearing and to easily withstand all the stresses of everyday use. Thanks to our patented click system, you can lay your chosen moderna flooring quickly and easily. Moreover, our natural laminates bear the environmental “Blauer Engel” (Blue Angel) mark, showing them to be low-emission products that protect both the environment and your health.

**Exclusive laminate**

## Exclusive laminate Very elegant, very solid – simply something special

Living in a stylish ambience – every interior lover's dream. Time to wake up! moderna skyline turns dreams into an effortless reality.

The classically cut extra-length panels are elegant and stylish in appearance – not least thanks to the special look of the all-round V-joint. When it comes to authenticity, the striking wooden finishes of moderna skyline are hard to beat. Planks 12mm thick give the impression of a solid and sophisticated wooden floor. moderna skyline will not only redefine your rooms, it will also bring with it a special charm and an atmosphere of well-being - finally turning your house into a home.

## Exclusive laminate Endlessly long, extra-wide – and genuinely impressive

Make your floor a feature and let it catch the eye! Because it's in a great place to do that.

moderna horizon gives living areas what they need: that certain extra something in terms of individuality and style. Invisible transitions from plank to plank create an impressive and endless character. Sophisticated and convincing. The beautiful, natural-looking oak decors make it difficult even for experts to tell moderna horizon from a real wooden floor.

And because we put extra thought into our laminates, selected decors from the collection are also available as staircase renovation systems: moderna scala. The perfect seamless continuation of your moderna horizon floor. More harmony, more expression. More than just a floor covering for your home.

### Mix and match with a vintage look – unmistakably you

Your home tells your story: Your favourite furniture, special heirlooms, souvenirs from your last holiday – these things fill your home with life. Transform your floor into another part of this very personal story! moderna variation is as versatile and as rich in variety as you. Two different plank widths of 328 and 190 mm give you endless possibilities for creating a completely individual laying pattern. Splits and knotholes accentuate the deep wood texture. The result is a unique and unmistakable vintage look. Add even more character to your home: Make it a reflection of your life story! With all your desires, memories and experiences. With everything that defines you.

## Exclusive laminate **DURABLE & ELEGANT**

Elegance means beauty and good taste. Our moderna elegance product line embodies this definition. Tasteful yet effective – grand yet simple – cultivated yet lively. Single plank oak combined with the wide format of 244 mm form the basis for an outstanding design platform. The decors are lively but move away from the rustic style of recent years. Cracks have disappeared, there are less knots. The colour design is warm and soft, with decors ranging from soft white-grey to a mid-brown shade, some with greyish elements. The four-sided V-bevel is unobtrusive and emphasises the country house flooring style. This high-grade laminate flooring has an authentic appearance and adds “that certain something” to your interior decorating style.

## Classic laminate

### Trendy stands for pleasing individualism

With “moderna impression 4V” we combine individual decors with optimum functionality: the laminate is easy to lay and maintain, always looks good and is extremely durable.

The four-sided V-bevel is designed as a micro-groove and has an elegant appearance. The Multiclic laying system is based on the patented UNILIN system and can be engaged at an angle plank by plank and then knocked into place. Just like that, you can be satisfied with the flooring right from laying.

### Trendy is delightful, during laying and use

Thanks to the tried-and-trusted Multiclic laying system, the moderna impression range is a delight, even during laying. The patented system can be engaged at an angle plank by plank and then knocked in place, so that room features such as doors or radiators do not present a problem. Six new decors are consumer-oriented and expressive. You are sure to find something to match your room design ideas.

## Profiles and plug-in profiles (rails)

### The perfect transition

The practical profiles allow you to master even the most difficult transitions quickly and easily.

#### Transition profiles

The classic solution for the transitions between rooms.

Just a detail? Not at all. When correctly installed they can create an ambience of elegance. High-quality, screwable aluminium profiles offer you many individual design options.

#### Compensation profiles

Compensation profiles provide seamless transitions between flooring at different heights to prevent tripping. Screw in or plug in elements, with cable ducts, height adjustment and much more – You will find the right solution for every application in our highly varied product range!

#### End profiles

For the perfect edge finish or a clean separation between tiles and natural stone flooring we offer you a wide variety of options. Top class aluminium profiles ensure a professional finish, quick and simple installation and individual look.

## Icon list

# Product advantages of laminate

[www.blauer-engel.de/uz176](http://www.blauer-engel.de/uz176)

### Blue Angel

You can rest assured that in terms of sustainability, we spare no effort whatsoever. For this reason, all our laminate products bear the “Blauer Engel” (Blue Angel) label, which was launched in 1978 and is one of the leading symbols on the market for outstandingly environmentally friendly products. Our products are therefore exceptionally low-emission.

### Made in Germany

As a traditional German enterprise, engaged in production since 1971, we are committed to manufacturing high-quality, highly attractive products. With our interior design products we are one of the world’s leading producers. So also for that reason, as a family-owned enterprise, we see ourselves as having a responsibility to produce with vision and always striving to improve the quality and appearance of our products. Many years of cooperation with our partners and customers in the interior design industry and the furniture industry have consistently helped us to fulfill the high demands and have therefore always been of especial importance to us.

### Water resistant 4h

Can be installed in humid rooms, such as bathrooms. This does not include outdoor areas and wet rooms, e.g. saunas, shower cubicles, steam rooms and rooms with a floor drain.

### Healthy living environment

As a traditional German enterprise, it is our constant striving to produce flooring for you using natural materials that meet the specified standards. The focus is thereby not only on the visual aspects, but also on the health of our customers. Our flooring products are especially suited for allergy sufferers. Moreover, through the special design of the surface finish, they offer no breeding ground for bacteria and microorganisms and are very easy to clean. Sustainability also plays a highly important role, and is supported by continuous technical progress in the field of production.

### Sturdy HDF-core with increased moisture protection

Thanks to the special processing of top-quality materials in our factory, we achieve exceptionally good moisture protection values that even exceed the applicable official standards. This enables us to Warranty the highest quality standard for all our laminate flooring products.

### Attractive laminate decors

moderna – The name says it all. We therefore make it our business to develop attractive laminate decors that are driven by trends but are also timelessly beautiful and stylish. Design your interior in line with your own ideas by choosing from our extensive range of attractive contemporary styles. The decors tend to differ in their nature-orientated designs and surface finishes. It is only the combination of the decorative effect and the surface embossing that gives the flooring its absolutely genuine appearance. The feel, look and design of the products play the key role. The product range therefore reflects the many different combination possibilities and variations of the various components. This means complete design freedom for you. Whatever style or trend you prefer, there is something for everyone.

### Hard-wearing

As far as its hard-wearing qualities are concerned, laminate is easily a match for other floor coverings, such as parquet or vinyl. Laminate belongs to the category of hard floor coverings, and in terms of robustness and wear resistance it is hard to beat. Even the plank thickness contributes to a high-quality product. Moderna offers the following thicknesses: 7, 8, 10 and 12 mm. You can say: the greater the structural height, the longer the product will last.

### Easy installation thanks to the patented click system

Thanks to our patented click systems, moderna floors can be fitted in very little time. Even when installed as a floating floor (i.e. not glued to the underfloor), you can be sure that the system will cope with all stresses. Our standard systems have been successfully established on the market for many years and have consistently proved themselves. Moderna laminate floors are distinguished between 2 different click-systems.

#### MULTICLIC®

##### Multiclic-system

This click-system based on the patented UNICLIC-system, which is the one most commonly used. moderna uses the Multiclic-system because both technically and functionally, it is one of the very best. Through the high pre-tensioning, the individual sections can be very quickly inter-locked with one another, and laying progresses easily and speedily. The additional possibility of horizontal joining also simplifies laying in inaccessible places (e.g. under radiators or door frames). Multiclic is characterised by high dimensional accuracy, optimum height match and joint-free friction locking.

#### MASTERCLICPLUS®

##### MASTERCLIC PLUS end connection

The unique combination of the non-adhesive Masterclit Plus click system:

- There are no protruding, difficult-to-handle tongues at the ends which could lead to an opening of a joint when lowering the plank.
- In contrast to the common “fold-down” laying methods, the ends do not lock in the moment the plank is laid.
- As soon as the next row of planks is laid, the Masterclit Plus click system is activated and its fixings lock automatically.
- The specially developed and patented profile geometry with height and side levelling secures the exact end positioning of the planks. This creates a pre-tension which ensures a durable joint lock.
- When disassembling the flooring, the Masterclit Plus connection can easily be pivoted out.

### Easy-care

Generally speaking, laminate is very easy to clean. It is sufficient and, depending on staining, wipe it with a slightly damp cloth.

### Extra-long plank format

These moderna collections are distinguished from those customary on the market by the extra-long plank format. It gives your home a style all of its own.

### Strong & stylish

This also applies to the thickness of the product. You can say: the greater the structural height, the longer the product will last. Absolutely top quality, in combination with a long plank format, is what makes the skyline collection so attractive.

### Endlessly long and wide

Not just long planks are currently much in favour, extra-wide planks are, too. The decors appear more restful and give a room a charm of its own. Combined with a modern vintage style, the planks acquire a special appearance.

### Antistatic

You know the feeling when you walk in a room, then touch something and get a slight electric shock. This is because you have become statically charged through the floor. While these shocks are not life-threatening, they are certainly unpleasant. With moderna flooring, this unpleasant side-effect has an end. The surface is specially treated so as not to become charged when people walk on it.

### Mix & Match

As the name moderna variation implies, this involves the combination of different plank widths with variations in how the boards are laid. This collection involves two board widths, one of 190 mm and one of 328 mm. So you can give free rein to your own creativity and ideas. The outcome can be whatever style and appearance takes your fancy.

### Classic plank format

The classic plank format is the one that currently enjoys greatest popularity. In the dimensions 198 x 1288 mm, 2-strip, 3-strip and plank decors come out at their best.

## moderna decors

For all our floor coverings, the best thing you can always do is check them out for yourself. Take a close look and physically feel the decor

structure of the various floor coverings. As individual and diverse are the wishes of our customers, so varied and wide-ranging are the decors we have on offer. Visit the specialist retailers to gain your own impression of how our materials look and feel, or take a sample with you and try it out at home. Pay attention to the key

parameters such as the decorative appearance, the embossing and the surface finish, as they all help you in deciding which one to choose. Based on our many years of experience, we have created the moderna decors through innovative new developments, achieving an authentic look of real wood, and also in the field of natural stone or tile imitation looking remarkably like the original.

Wood finish  
matt structure

A deeply embossed relief emphasizes the grain run of the reproduced wood fibres and conveys an impression of a brushed wood surface. The matt appearance visibly and tangibly produces the natural impression of untreated or naturally oiled real wood.

Raw wood  
pore structure

An elegant surface structure that imitates the natural appearance of untreated or naturally oiled real woods. With this technology the finest planning tool marks visually and tangibly emphasise the look of freshly sanded wood.

Special pore  
effect

Embossed surfaces give moderna laminate floors even more authenticity – especially with the special pore effect printing. As with this the pores, filled knots and cracks are individually coordinated to the decor pattern underneath.

Natural wood  
structure

The natural wood structure and the matt appearance create the perceptible and visible impression of a naturally oiled real wood.
