Simply
feel good

In harmony with nature

To each of us, home means within our own four walls. But the home we all share is the environment, without which we cannot live. So those who love their homes must also love the environment. That's why here at moderna, we feel compelled, both as people and as a company, to do everything we can to conserve our resources and protect our environment. Our moderna parquet flooring is produced with great care and responsibility towards nature. In the selection of our materials, we make sure that they are natural, high in quality and manufactured in an environmentally sustainable manner. Nearly all the woods we use are sourced from sustainable forestry. Our fundamental values are part of a system. That's why compliance with environmental guidelines, product quality and work safety in our facilities are audited at regular intervals.

The most beautiful gift

Real wood is one of nature's most beautiful gifts. Because we want to share this gift with you, we have compiled our moderna parquet product range just for you. A variety of distinct looks demonstrates how moderna parquet flooring is individually made from high-quality wood. The characteristic properties are typical of natural wood, and yet reinterpreted in our own unique way: natural and sustainable, solid and high quality, vivid and warm, stylish and modern, sensual and elegant. moderna parquet is a sophisticated product range with high attention detail – for people who value real quality, maintain their own personal style, like to make a mark and enjoy timeless aesthetics in combination with comfortable trends. For people who love their homes.

Prefabricated parquet flooring

- A Surface**

Character

TIMELESS

A classic - sophisticated and aesthetic

VERSATILE

Large selection of designs with various surfaces

DURABLE

Premium quality thanks to advanced technologies

HEALTHY

Hypoallergenic properties

ECOLOGICAL

FSC-certified wood from sustainable forestry

Connection

Installation of moderna parquet flooring is quick and easy.

Different click systems ensure lasting connections.

The 5Gc system is based on a fold-down principle along the short side. After the panels have been correctly positioned on the long side, simply press down to lock them in – so easy, a child could do it. The short sides and the long sides are interlocked directly, so no tools are required. In a nutshell: position, rotate, click. The 5Gc system (licensed from Välinge) is extremely stable and guarantees high tensile strength.

With the clic2tap system, you can install your parquet flooring securely in a flash. clic2tap is among the most tried and true connection systems because it makes installation so easy and still meets all of the requirements for a permanent, durable connection.

It all comes down to the surface The right treatment

LACQUERING

The flooring is sealed with several layers of a UV-hardened acrylic varnish. The lacquer forms a protective coating and prevents the wood floor from damage, such as scratching or cracking.

- Semi-matt lacquer brings out the natural character of the wood floor and the depth of the grain.
- Matt lacquer provides a soft, warm look.

PROFESSIONAL LACQUER

- Our multi-layered professional lacquer provides enhanced scratch protection and resistance to mechanical damage.
- Wooden floors with professional lacquer are extremely well-protected against daily wear, stains and discoloration.
- This is the toughest lacquer on the market (tested to 7,000 revolutions using the Taber method and falling sand abrasion test in accordance with EN 14354).

OILS

Oiled surfaces offer a particularly natural look and feel. The oil penetrates the wood and provides reliable protection from moisture, dirt and scratches. Meanwhile, the wood surface remains breathable and the natural texture of the wood stays tangible.

The floor permanently retains its biologically valuable characteristics.

UV OIL

- Hardening under UV light
- Silk-matt surface look
- Formaldehyde and solvent-free
- Can be refurbished

OXY OIL

- Oxidatively hardened (air-dried) surface
- Partially easy to repair
- 99% plant-based origin
- Formaldehyde and solvent-free

BEVELLED EDGES

Chamfered wooden floor boards have finely bevelled edges. This makes the planks appear longer and makes them lighter. The bevel underlines the natural look of the floor.

BRUSHING

Brushing gives parquet flooring an intentional patina – makes it appear aged – as though it has been already used for generations. Of course, it still has all of the advantages of a real wood floor. The brushing treatment brings out the natural charm and structure of the wood grain. The floor has a softer, warmer, cosier look.

STEAMING

The floor is treated with hot steam. This treatment makes it more resistant to fluctuations in temperature and humidity. In addition, the steam changes the colour of the parquet flooring, giving it a decorative touch.

COLOURING

Wooden floor boards can be coloured by coating the surfaces with lacquers, coloured oils or high-quality stains sealed with lacquer. This creates a modern look that is out of the ordinary, but retains the natural structure of the wood grain.

Wood gradings

VINTAGE

Extremely rustic, healthy and filled knots of different sizes, cracks, sapwood, silver grains and natural colour differences possible.

DISTINCTIVE

A full spectrum of natural features in the wood structure and characteristics, various colours and grains, may include healthy, filled knots of various sizes, silver grains as well as natural differences in colour.

LIVELY

An abundance of wood characteristics, wooden boards of different colours, various wood patterns, may include healthy, filled, medium-sized knots, sapwood at the edges and silver grains.

moderna palais

CLASSIC

SOPHISTICATED

INDIVIDUAL

Old-fashioned? Not at all! Reflecting the spirit of the current retro trend, a parquet flooring classic is experiencing a well-deserved comeback. The traditional herringbone pattern is once again becoming a modern eye-catcher on domestic floors. The 3-layer parquet moderna palais features an attractive herringbone design with an all-round bevel. This places additional emphasis on the distinctive character of the floorboards. What makes it special: Firstly, the click system ensures both simple and quick laying, and secondly, eliminates the need to distinguish between right and left planks. moderna palais adds classic accents to modern interiors: In combination with white walls or concrete looks, this exclusive parquet flooring is also a popular choice to go with modern furnishings in a minimalist style to deliver a particularly interesting and individual look.

moderna exquisit

STYLISH

TIMELESS BEAUTY

TOP QUALITY

Carved from a single piece of high-quality wood: the moderna exquisit 1-strip plank flooring is the perfect choice for those who love wood and appreciate real quality. With visible knots and subtle differences in colouring, it expresses and emphasizes the natural appearance of the wood. moderna exquisit creates a stylish ambience in every space and can be used with both classic and modern furnishings. The choice of surface adds an individual accent – walnut oiled or white oiled, distinctive, brushed. For a lighter appearance, the edges of the planks are finely bevelled.

moderna premium

HARMONIOUS

SOLID

DURABLE

Ready, steady, go! moderna premium is a prefabricated parquet in a 3-strip look for an extremely lively effect. This flooring is for people who like to express their individual style and bring it to life in their interior spaces. They recognise and set trends within their own four walls. moderna premium offers a choice four different design variants. The decors range from classic oak and beech to trendy ash – each is accented by the individual treatment and processing of the wood. And because parquet flooring has more than one life, the surface can always be refurbished based on trends and taste.

3-strip flooring

Parquet flooring in a 3-strip look is also known as “ship deck” flooring. Thanks to its interesting interplay of colours and vivid design, a 3-strip wood floor can be used with a wide variety of interior design styles.

moderna comfort

ECOLOGICAL

FUNCTIONAL

CLASSIC

Because classic is simply appealing! moderna comfort, with all of the functional advantages and great look of parquet flooring, is just irresistible. Not to mention its attractive price. The 3-strip prefabricated flooring is an icon of classic, elegant style. Its distinctive grading lends a natural liveliness to every room, while emphasizing the individuality of the furnishings. Oak, ash or beech? All three types are sealed with a UV-hardened acrylic varnish for additional protection from scratches and cracks. The lacquer is not only functional: it has an aesthetic effect as well. It accentuates the natural character of the wood floor, lending it a softness and warmth.

* only for hot water systems

Wood is a natural product that may exhibit differences in colour or structure. Open joints may also occur, depending on the climatic conditions in the room and are not considered grounds for return. Lighting conditions may cause colour changes of the wood.

Mouldings and more

Our extensive accessory programme provides you with many options to enhance the beauty of your flooring and to ensure that you will be able to enjoy it for a long time to come. High-quality mouldings give your spaces the desired, harmonious overall look or add individual design accents. Our practical profiles allow you to master even the most difficult transitions quickly and easily. We've thought of everything, and especially of you!

Parquet moulding clip

PL 40

PL 60

The profiled, wooden skirting boards cover the expansion joints between the flooring and the walls. Our parquet mouldings PL40 and PL60 are offered in matching wood colours, so you can find the right moulding for every wood floor. You can use our parquet moulding clips to attach them.
